The following update has been made to this publication.

**Page 10**
Throughout this page, reference to E.coli O157 has been updated to E.coli O157:H7

**Page 10**
The penultimate sentence of the 1st paragraph previously read;

> Certain strains are known as Shiga toxin-producing E.coli (STEC - can also be called verotoxin producing or VTEC), including E. coli O157; these produce toxins which causes illnesses ranging from mild diarrhoea through to very severe inflammation of the gut.

This has been updated to;

> Certain strains are known as Shiga toxin-producing E.coli (STEC - can also be called verotoxin producing or VTEC), including E. coli O157:H7. Some of these can produce toxins which may lead to a range of illnesses from mild diarrhoea through to very severe inflammation of the gut.

**Page 63**
Reference to the orange hazard pictogram has been updated to the current style, diamond with a distinctive red border and white background.
