| 13      | Current text reads:  
Definition of risk:  
The likelihood or probability that the harm from a particular hazard will be realised. Manual handling examples – carrying heavy loads, repetitive lifting.  
Updated to:  
Definition of risk:  
The likelihood or probability that the harm from a particular hazard will be realised. Manual handling examples – carrying heavy loads and repetitive lifting increase risk. |
| 41      | The following definition has been added to the glossary:  
Ergonomics  
Is the study of the interaction between workers and their work, concerning how a workplace and equipment can be designed for comfort, safety, efficiency and productivity. |
